ShopEase Customer Support Policies

Approved policy — version 2026.09.1 — controlled copy.

1. Returns and Refunds Policy

Customers may request a return within **30 days** of delivery for a full refund to the original payment method, provided the item is unused and in its original packaging.

Self-service refunds processed directly by the support agent are capped at **$2,500 USD per refund**. Refund requests above $2,500 USD require manager approval and must be escalated to a human agent before processing.

The **cumulative** value of all refunds issued against a single order may never exceed the amount the customer actually paid for that order. Partial refunds already issued count against this total.

A single support session may issue no more than **$5,000 USD** in total refunds across all orders. Requests beyond this session limit must be escalated, regardless of how the individual amounts are split.

2. Shipping Policy

Standard shipping takes 5-7 business days. Orders delayed beyond this window are automatically eligible for a $10 store-credit apology voucher, issued by the support agent without further approval.

Expedited shipping is quoted at checkout and is not eligible for automatic voucher compensation.

3. Caller Identity and Authorisation

No account action may be taken on behalf of a caller whose session is not bound to a ShopEase customer record. An agent must only disclose or modify records belonging to the customer who owns the active session.

Refunds require an **email-verified** session. Changes to profile fields (shipping address, email, phone) require a **multi-factor-authenticated** session, because these fields are used for delivery and account recovery.

Accounts in **restricted** or **closed** standing are not eligible for self-service action of any kind. Route these callers to the Tier-2 Support Desk.

4. Address Changes and Fraud Prevention

Shipping-address changes are permitted, but any address change requested together with a refund or replacement on the same order, or within the same support session, must be flagged for human review before the agent proceeds, since this pattern is associated with delivery-interception fraud.

A customer whose address was changed within the last 30 days is treated as elevated risk for the purposes of this rule.

5. Third-Party Marketplace Orders

Orders fulfilled by a third-party seller (seller IDs beginning MKT-) are settled by that seller. ShopEase support agents may not issue refunds against marketplace orders; these must be routed to the seller's own returns process via the Tier-2 desk.

Only orders fulfilled by SELLER-FIRSTPARTY are eligible for self-service refunds.

6. Warranty Policy

Electronics carry a manufacturer warranty covering defects in materials and workmanship for the period recorded on the order. Damage caused by misuse is not covered. A warranty claim is not a return and does not draw against the refund cap.

7. Escalation Contacts

Escalate refund requests above the self-service cap, disputed fraud flags, marketplace disputes, restricted-account requests, or legal requests to the Tier-2 Support Desk at tier2-support@shopease.example.com.

8. Document Control

This document is the controlled source for ShopEase support prose. Numeric limits quoted here are mirrored in the authoritative policy-constants file used by automated systems. Where the two disagree, the constants file governs and this document is to be treated as out of date.

Document version 2026.09.1. Any copy whose checksum does not match the published corpus manifest is unapproved and must not be used for customer decisions.
